THE LOPOLIGHT TRICOLOR

THE ORIGINAL LOPOLIGHT – NOW IN ITS 5TH EDITION.

About 250.000 lights ago – the very first Lopolight Navigation Light was a LED tricolor light. It was installed on a 10 meter sailboat the *Courageous* – an Aphrodite 101.

Back then it was the dramatically reduced power consumption that was the big motivator for changing to Lopolight, today you can get this from many suppliers, but Lopolight is still the only type approved LED tricolor that gives you all the LED benefits – including that the light is fully potted out both vibration and waterproof.

The range of tricolor lights today is spanning from the small 7 meter / 23 feet sailboat to really large yachts up 20 meter / 66 feet.

The tricolors are found in different configurations:

- Pure tricolor
- Pure tricolor with Windex light & mounting
- Tricolor with Anchor
- Tricolor with Anchor and Windex light & mounting
- Tricolor with Anchor and strobe light*

Because the size of the masthead is vastly different from a 7 meter fraction rigged sailboat to a 20 m sail yacht we have given the lights for boats under 12 meter a different mounting system than the lights for over 12 meter yachts – as you can see overleaf.

*) when the strobe function was introduced 20 years ago it was a real safety booster, but today with AIS transponders and a widespread use of Radar we are discouraging the use of the strobe light – as it is not legal according to the COLREGs

TRI-COLOR RANGE

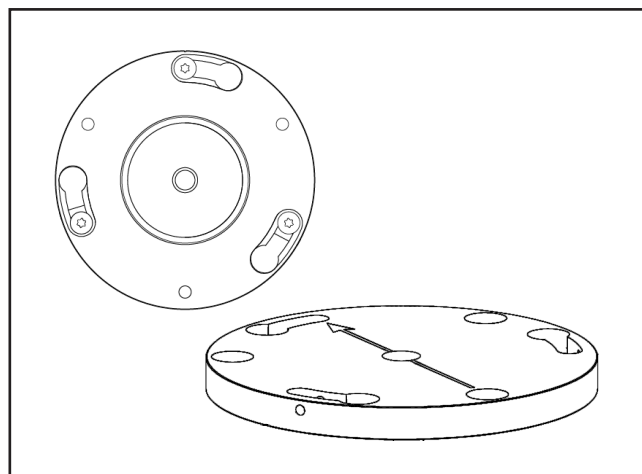

UNDER 20 METER

These lights are delivered with the new low Lopolight FB base, the lights are pre-cabled, long cable versions are available. The FB base is chosen to ensure a compact install on a small masthead. The FB base can be modified to allow cable transit in the desired direction.

Power connection: Cabled

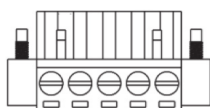

UNDER 12 METER	
P/N (NEW)	Description
101-005-FB	1nm Tricolor, silver, w/FB base
101-005-FB-B	1nm Tricolor, black, w/FB base
101-005W-FB	Tri-color w. windex mnt+light, silver w/FB base
101-005W-FB-B	Tri-color w. windex mnt+light, black w/FB base
101-009-FB	Tri-color/anchor, silver w/FB base
101-009-FB 22M	Tri-color/anchor, silver w/FB base
101-009-FB-B	Tri-color/anchor, black w/FB base
101-009W-FB	Tri-anchor, Windex mnt+light, Silver w/FB base
101-009W-FB 22M	Tri-anchor, windex mnt+light w/FB base
101-009W-FB-B	Tri-anchor, windex mnt+light black w/FB base

OVER 20 METER

These lights are delivered with a light-weight tall base (TB) lifting the light 64mm up to clear obstructions for the light on larger mastheads. The base is IP68 waterproof and allows for your cabling to be professionally connected to the light. The lights in this section are only available in black
